Oleksiy Khudoshyn

Software & Backend Engineer · Java/Spring Boot · Go

Bergheim (NRW), Germany | khudoshyn.o@gmail.com | +49 15204799383 | LinkedIn | GitHub

Web-CV

PROFESSIONAL PROFILE & APPROACH

Software and Backend Engineer (Java, Spring Boot, Go) with a rigorous engineering foundation (Kharkiv Aerospace University, Dipl.-Ing.) and extensive experience leading commercial projects. I approach development through structural domain modeling and ERM design: aligning business requirements with a resilient, maintainable architecture that adapts swiftly to changing market needs — without drama and without rebuilding the system core.

// Guiding principles: Architecture before code; data security before deployment; client value before developer convenience.

TECHNICAL CORE COMPETENCIES

Backend & Languages: Java 21, Spring Boot 3, Go (Golang), Hibernate 6, Spring Data JPA, Kotlin

Databases & Storage: PostgreSQL, SQLite (WAL, Litestream), MongoDB, MS SQL

Cloud, Infra & Linux: Linux (Debian), Docker, Kubernetes (k3s), Traefik, GitLab CI/CD, Proxmox Bare-Metal

Standards & Quality: Clean Architecture, REST APIs, OpenAPI/Swagger, JUnit 5, Testcontainers, GoBD, DSGVO/GDPR

WORK EXPERIENCE

Java Backend Developer — *Alpha Loop GmbH, Lindlar (IHK Professional Placement)*

03/2026 – 10/2026

- Maintained and enhanced a production Java enterprise ERP platform within a team via Jira (Service Desk client tickets and development backlog).
- Executed persistence-layer migration from Hibernate 5 to Hibernate 6 (Jakarta Persistence transition, entity type mappings, and HQL query refinement).
- Resolved high-priority production bugs and delivered functional module features adhering to enterprise clean-code standards.

Software & DevOps Engineer — *Light Digital Solutions GmbH, Hürth*

03/2024 – 02/2025

- Engineered Go microservices and backend services for a cross-platform sports application (marathon, triathlon, cycling) in an agile Scrum setup.
- Maintained and enhanced a Kotlin mobile application ensuring continuous synchronization with backend APIs.
- Executed end-to-end data migration from MongoDB to MS SQL Server, restored BSON dumps, and built automated Power BI reports on Microsoft Azure.
- Mentored an engineering intern in REST API protocols and frontend-backend data exchange standards.

Backend Java Developer — *Medcol FZCO — "Medical Atlas" Project*

10/2023 – 12/2023

- Sole backend developer on the project within the team: engineered backend architecture from first line of code to the internal MVP.
- Built the Java/Spring Boot backend with PostgreSQL, Hibernate ORM, stateless JWT authentication, and OpenAPI/Swagger documentation.
- Commended by the CTO for clear communication, clean code structure, and rapid onboarding.

Operations & Project Manager — *Polysan Ukraine PE, Kharkiv*

06/2014 – 02/2022

- Managed B2B commercial operations and public procurement tenders (1,043 state tenders, 521 contract awards).
- Established structured operational workflows, budget tracking, and strict adherence to contractual and regulatory compliance.
- Coordinated cross-functional teams across procurement, logistics, and sales to ensure deterministic contract fulfillment.

PRODUCTION & SHOWCASE PROJECTS

Numi — GoBD-Compliant Invoicing PWA (Go 1.25, SvelteKit, SQLite WAL, Litestream) numi.report

Designed and built end-to-end, solo: Go backend (Clean Architecture), SvelteKit PWA, SQLite (WAL) with continuous Litestream replication, and GoBD-compliant immutability (§14/§19 UStG, DATEV export readiness). Deployed on my own Proxmox/Debian 12 infrastructure via Docker, GitLab CI/CD, and Cloudflare Tunnel. In live production with an active beta client.

Lebens Rhythmus / tlab29.com — Creative Studio Platform (Java 21, Spring Boot 3.5, PostgreSQL, k3s) tlab29.com

Designed and operated in live production: Java 21, Spring Boot 3.5, PostgreSQL, Kubernetes (k3s) with Traefik, and GitLab CI/CD on bare-metal Proxmox/Debian 12. Implemented a zero-data-loss disaster recovery strategy: automated cron restoration drills, offsite cloud replication, and verified recovery following a real-world hardware power outage.

EDUCATION & CREDENTIALS

Computer Science Expert in Software Development (FIAE IHK) — State Qualification · AFP Akademie Köln (2025 – 2027)

Diplom-Ingenieur (Univ., equiv. M.Sc. in Engineering) — National Aerospace University (KhAI, 1993 – 1999)

Java Backend Development (Intensive Program) — Tel-Ran.de, Berlin (2022 – 2023)

Specialized Physics & Mathematics Lyceum — Advanced Mathematics & Physics focus, Zhovti Vody

LANGUAGE PROFICIENCY

- German — B1 (certified, daily professional use)
- English — Fluent
- Ukrainian — Native
- Russian — Native
